

**Anna Schuh, MD, PhD,**

**MRCP, FRCPath**

University of Oxford

Oxford, UK

---

**Current Role:** Professor Anna Schuh, MD, PhD, FRCP, FRCPath, was appointed as the Director for Molecular Diagnostics, Department of Oncology, University of Oxford in 2014. She has been the Clinical Lead for the Oxford Molecular Diagnostics Centre (OMDC) since 2008. She is an honorary consultant haematologist and the Director of the University's online part-time Master's Programme in Precision Cancer Medicine.

**Clinical Focus & Interest:** Prof. Schuh is interested in chronic lymphocytic leukaemia (CLL) and is the Chief Investigator of Oxplore, a programme aimed at improving risk prediction of patients with pre-B cell malignancies. She has served as a principal or chief investigator in over 50 early and late phase clinical trials in CLL and has authored or co-authored over 260 publications.

**Experience:** Prof. Schuh was the Clinical Lead for the Oxford Genomics Medicine Centre from 2014 to 2017 and leads the Genomics England Clinical Interpretation Partnership for Haematological Malignancies. In addition to other national and international roles, she also chaired the UK CLL Forum from 2016 to 2019 which promotes training and education, and she led the UK's guidelines writing group for CLL Therapy on behalf of the British Society of Haematology.

**Affiliations:** Prof. Schuh was recently appointed as the Chair of CLL Research in the UK by the National Cancer Research Institute and to the board of the international workshop on CLL (iwCLL). She is a visiting faculty member of the Muhimbili University with Health and Allied Sciences in Dar es salaam, Tanzania and the Chief Investigator of an NIHR funded Global Health Programme that aims to improve early diagnosis of EBV-related lymphomas in East Africa.
